

FCC,I am writing you to reject the NAB's petition 04-160. I receive my traffic and weather reports from my XM radio, which I pay to subscribe. It is my opinion, that the NAB has in their rights to regulate and monitor the public airwaves, but not a paid service. The information and quality of service that I receive from XM Radio is not found on these public stations. As a paid subscriber to XM Radio, I feel that I deserve, and it is my right, to have the ability to choose what information I receive or do not receive. Thank you for your consideration.

XM Listener,

Stephen Berentsen
